Check out my work! 

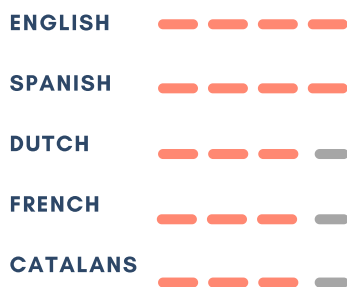

ABOUT ME

Made in Belgium in 1991. Travelled a lot due to my family relocating often, which has made me a chameleon in work, but also adaptable. Recently I've been given the opportunity and finally a choice to follow what I really want to do. IT has always been around me while growing up, I even married into it. I enjoy the challenges and the self learning process. I look forward on building many more projects and growing my skills.
